

Decorating made easy

Who doesn't respond to beauty? Whether its artwork, objects, a landscape or plants, beauty is good for the soul.

To celebrate spring Go Arty recommends adding little touches of playful hues and vibrant patterns with homewares and art. The mood today is less about matching and more about mixing, combining styles and textures to create something fresh.

It takes time for a house to tell the story of its owners, time for a house to become a home. In decorating a touch of bravado can reap huge rewards – yes, rules are sometimes meant to be broken, or at the least bent a little.

There are experts who can help you put your ideas into reality. Wanda and her talented artists do this daily, so why stress and waste your energy? Go Arty makes it easy.
